

DIGITAL ACCESS PLAN

- Where passwords are stored (not the passwords themselves)
- How to access them
- Backup codes

2FA accounts:

- Gmail Account
 - Apple iPhone

1. Don't cancel my cell phone, and keep it active for more than a year because you will need to continue to use it, and to update passwords as needed.
 2. Make sure to update passwords for all accounts that are SMS-based / 2FA.

List of passwords for all accounts are stored here:

(*draft example: password doc stored in my safe, located in my closet, safe code is my sister's cell phone passcode*)
